

Sarah Meyers

sarmey47@gmail.com | <https://sarahmeyers.dev> | San Diego, CA

Senior software engineer with 8+ years of full-stack experience, with deep focus on frontend architecture, design systems, and user-centered interfaces. Skilled at partnering with design and product teams to turn prototypes into accessible, performant React/Next.js experiences.

Key Skills

- **Frontend & Design:** React, Next.js, Vue.js, TypeScript, HTML, CSS, Figma, Design Systems, Accessibility, Redux, Cypress, Jest
- **Backend & Infra:** Node.js, Java, Go, Python, GraphQL, REST and SOAP APIs, Spring Boot, PostgreSQL, MySQL, Kubernetes, Docker, Terraform, Bash, Scala
- **Practices:** Agile, AI-Assisted Development, Prompt Engineering, Architecture, CI/CD, Data Migrations, Mentoring, TDD, Team Lead, Tech Lead
- **Tools:** GitHub, Jira, CircleCi, Grafana, Datadog, Fullstory, AWS, GCP, Linux, Claude (Anthropic), Apache Spark

Experience

Acrisure — Senior Software Engineer

July 2024 - Present

- Lead full-stack projects from design handoff through delivery, partnering closely with product and design teams and mentoring junior engineers to ship on schedule
- Redesigned the front-end search experience as part of a client data consolidation effort, improving accessibility and efficiency for the 40,000+ clients migrated onto the new system
- Built an end-to-end business search and import UI with Redux for state management, pairing it with MySQL and API work to streamline user workflows, in collaboration with developers across teams
- Partnered with design to identify data-accuracy gaps affecting the user experience, architecting a Java service and integrations to power a cleaner, more reliable front end
- Redesigned the website login experience, integrating company-wide SSO to simplify authentication while coordinating with third-party providers to ensure a seamless user flow
- Contributed front-end features to a quoting platform used by 1,000+ monthly users to compare insurance rates across 104 carriers nationwide

Viasat — Software Engineer III

August 2018 - November 2023

- Led the front-end launch of an enterprise data catalog, delivering ahead of schedule
- Served as the go-to expert on the external catalog platform, delivering regular updates to stakeholders
- Designed and built an internal self-service data access platform end-to-end, eliminating 100+ support emails per month through automation
 - Built the front end in Next.js on the company's React component library and brand guidelines, working directly from a product designer's Figma specs
 - Designed the secure Go REST API and PostgreSQL backend powering it
 - Set up CI/CD and end-to-end testing to keep the front end reliable through rapid iteration

Education

University of Maryland, College Park, MD — Bachelor of Science in Computer Science

December 2017
